Dermal Curette 5mm Loop

Popular in human dermatology for skin scraping or debridement of necrotic wounds.

This curette is used for scraping skin lesions and growths. Stainless steel seamless round loop tip. The loop is sharp on inside edge and blunt on outside so lesion can be removed but surrounding skin is not damaged. Sterile. Blue plastic handle.

MaxO2® Oxygen Analyzer

Oxygen: Know what you are delivering!

Oxygen therapy can be an important treatment modality for critically ill patients.

A useful measurement is the actual oxygen level in an enclosed ICU environment. Too low of oxygen is not beneficial and too high of prolonged oxygen exposure is not ideal.

The MaxO2® Oxygen Analyzer are portable hand held oxygen analyzers that give the real time oxygen level on a constant basis.

Two options:

An external sensor either located inside the display or attached to a 10 ft. cord.

- Simple one-touch on/off
- Calibrate room air (=20.9%) or 100% oxygen
- Battery operated by 2 AA for 5,000 hours
- 24 month warranty on sensor

Weight: 0.4 lbs.

Dimensions: 3¾" tall x 3" wide x 1½" thick

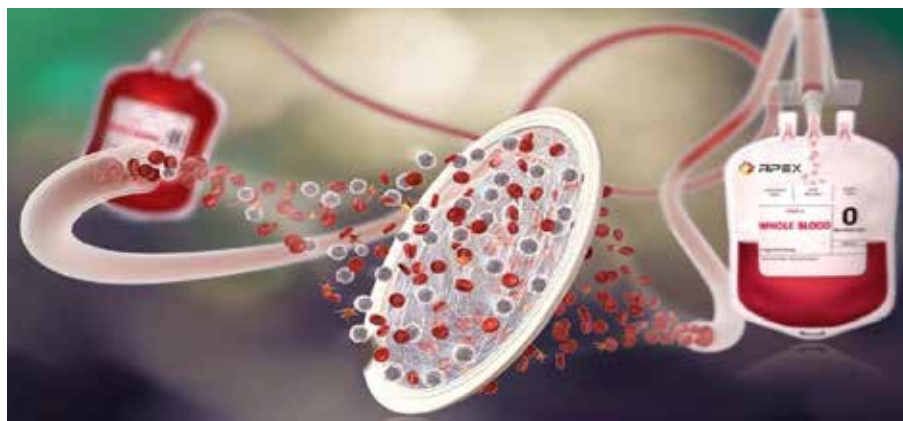

J1498 MaxO2® with internal mounted sensor

J1498A MaxO2® with external sensor attached to 10 ft. cord

New Products

Leukocyte Reduction IV Filter

It is a well established practice in human medicine to filter out leukocytes before blood transfusions. Leukocytes are unnecessary contaminants in unfiltered blood products. They have been reported to be responsible for a variety of transfusion reactions such as febrile non-hemolytic reactions, alloimmunization, immunosuppression, and transmission of intracellular viruses.

The Leukoreduction filters selectively remove WBC's through a series of electrostatic charges. The filter process will remove 99% WBC and recover 93% RBC's.

There are two options for leukoreduced blood transfusion:

Pre-storage: after standard collection for blood. The filter is attached to newly collected whole blood and pass through special IV filter set to new collection bag.

Post-storage: when ready for patient transfusion, insert IV filter set to blood bag like standard transfusion set.

Pre-storage

J1472 Leukoreduction IV Filter Set Pre-Storage

- 62.5" long (56" to the blood bag)
- blood bag 6.5" long and 250ml
Dist \$42.00 List \$54.00

Post-storage
